Aqua MSL-45/sm light oak
RC-970 · Art.-No. 7131

**Range of use:**

- Interior and exterior wood
- Dimensionally stable wood elements: e.g. windows and doors
- Wood elements with limited dimensional stability: e.g. shutters, profiled boards
- Wood elements without dimensional stability: e.g. fences, frame-work, arports, wood sidings
- Biocide-free top coat on impregnated wood, e.g. garden furniture
- Clear UV+ also as seam over pigmented variations for permanently birght wood
- In connection with Aqua RG-27 for the renovation of weathered wood

Properties:

- Drip inhibited
- Weather and UV resistant
- High UV protection, also for bright colours and Clear UV+
- Silk matt
- Dirt-repellent and easy to clean
- Block resistant (according to guideline HO.03)
- Good flowing properties
- Without biocides
- Elastic

Directions:

- Stir material well
- Brushing oder rolling
- Apply in grain direction
- Apply 2nd coat after drying
- Apply a 3rd coat with Clear UV+, if necessary to fixate the required colour permanently. (Seam that will be renewed in case of renovation)
- If you paint exterior wood in the colour Clear UV+, a pretreatment with Wood Protection Cream clear is mandatory
- End grain surfaces to be protected against water intake by several coats of the material in the respective colour or to be painted with SW-910 (3777)
- Windows and exterior doors need 3 coats
- All colours can be mixed among each other

Application rate:

- Ca. 100 m/m² per coat
- Pigmented: 2 coats
- Clear UV+: 3 coats

Further information on working and product specifications are found in the latest Technical Data Sheet.
